EDUCATION

Vellore Institute of Technology, Andhra Pradesh
B.Tech, Computer Science Engineering; CGPA: 8.09/10

Sept. 2023 – July 2027
Vijayawada, India

Sri Chaitanya Junior College, Bhaskar Bhavan
Class XII (PCM): 90.5%

2022
Hyderabad, India

EXPERIENCE

Product Analyst

Jul. 2026 – Present
Hyderabad, India

Alfaleus Technology Pvt. Ltd. (Medical Device Startup)

- Structured the company seed pitch across 18 slides for a Rs. 3.5 Cr raise at 10% equity, reconciling unit economics (56-60% gross margin, ~7:1 LTV:CAC) into a single investor-facing narrative.
- Built and segmented three distinct outreach document sets across VC, distributor and eye-foundation channels covering 28+ contacts, tailoring positioning to each audience rather than reusing one deck.
- Ran vendor evaluation for a hardware pilot across four suppliers, selecting TPE injection moulding at Rs. 250/unit over an in-house silicone route for a 100-unit batch.
- Identified a dimensional conflict between the enclosure bore and the electronics assembly before tooling was commissioned, preventing committed spend against an unbuildable specification.
- Analyzed product usage and clinical feedback datasets to surface recurring issues, translating findings into prioritized changes to clinician workflow and patient-side usability.

Co-Founder

Sept. 2023 – May 2026
Hyderabad, India

Vectr (Content-Tech Startup)

- Led a 30+ member cross-functional team across operations, design and engineering, running weekly reporting and status cycles.
- Drove acquisition to 10,000+ installs, 3,000+ Play Store pre-registrations and 400,000+ LinkedIn impressions by tracking funnel performance across campaigns.
- Built financial and growth models in MS Excel to support pre-seed fundraising discussions with Indian and international VC firms.

Founder's Office

Sept. 2024 – Apr. 2025
Vijayawada, India

TROVIA

- Owned cross-functional projects, market research and daily operations for founders building a campus rental platform, converting open-ended direction into executable workstreams.

Venture Analyst

May 2024 – Jul. 2024
Hyderabad, India

Quick Launchr

- Screened and evaluated 100+ early-stage companies against defined financial and market criteria, producing written recommendations for partner investors.
- Benchmarked companies against sector comparables and reconciled inconsistencies across self-reported and third-party data sources.

SELECTED PROJECT

Hitwicket Product Investigation

2026

Self-initiated product teardown of a live mobile game

- Played 56 matches over 30 days and documented five compounding problems, from first-session comprehension through to a dormant alliance system with zero collective activity.
- Argued that peer-to-peer acquisition depends on a functioning social retention loop, and that user-acquisition spend without one fills a leaky funnel.
- Proposed a single scoped intervention (alliance-vs-alliance weekly fixture) with a defined experiment, a guardrail metric, and an explicit list of internal data that would falsify the thesis.

ACHIEVEMENTS & LEADERSHIP

- Rank 16 of 800+ colleges, National Entrepreneurship Challenge (IIT Bombay):** placed in the top 2% of participating institutions in a year-long competition judged on venture traction, execution, and quantitative reporting of outcomes.
- Runner-up of 900+ teams, Proxy National Hackathon:** delivered a working solution and defended the underlying approach and assumptions to a technical judging panel under a fixed deadline.
- Sponsorship Lead, VITOPIA 2024:** pitched 450+ companies in 12 days and closed sponsorships for the university's annual festival, managing the outreach pipeline end-to-end.
- Convener, VITAURA Technical Fest:** led operations and coordination for the university's largest technical symposium.

SKILLS

Analysis: Financial Modeling, Unit Economics, Market & Sector Benchmarking, Data Reconciliation

Tools: MS Excel (advanced), MS Office Suite, Python, SQL, Figma, Notion, Jira

Operating: Vendor Management, Investor Communication, Cross-functional Coordination, Documentation

Relevant Coursework: Applied Statistics, Cost Accounting, Management Accounting, Engineering Clinics
