EDUCATION

Vellore Institute of Technology, Andhra Pradesh
B.Tech, Computer Science Engineering; CGPA: 8.09/10

Sept. 2023 – July 2027
Vijayawada, India

Sri Chaitanya Junior College, Bhaskar Bhavan
Class XII (PCM): 90.5%

2022
Hyderabad, India

EXPERIENCE

Product Analyst

Jul. 2026 – Present

Alfaleus Technology Pvt. Ltd. (Medical Device Startup)

Hyderabad, India

- Analyzed product usage and clinical feedback datasets to identify recurring issues and usage trends across the installed base.
- Reconciled unit economics into an investor-facing model, including gross margin of 56-60% and an LTV:CAC ratio of approximately 7:1.
- Segmented outreach across three distinct channels (VC, distributor, institutional) covering 28+ contacts, varying positioning by audience.
- Built structured reporting on device performance metrics to support internal review cycles and stakeholder updates.

Co-Founder

Sept. 2023 – May 2026

Vectr (Content-Tech Startup)

Hyderabad, India

- Drove acquisition to **10,000+ installs, 3,000+ Play Store pre-registrations and 400,000+ LinkedIn impressions**, tracking funnel performance campaign by campaign.
- Built financial and growth models in MS Excel supporting pre-seed fundraising discussions with Indian and international VC firms.
- Ran weekly reporting across a 30+ member team spanning operations, design and engineering.

Venture Analyst

May 2024 – Jul. 2024

Quick Launchr

Hyderabad, India

- Screened and evaluated 100+ early-stage companies against defined financial and market criteria, producing written recommendations for partner investors.
- Performed quantitative and qualitative analysis of sectoral growth rates and unit economics to assess investment viability.
- Benchmarked companies against sector comparables and reconciled inconsistencies across self-reported and third-party data sources.

Founder's Office

Sept. 2024 – Apr. 2025

TROVIA

Vijayawada, India

- Owned market research and daily operations for a campus rental platform, working directly with founders on go-to-market.

SELECTED PROJECT

Hitwicket Retention Analysis

2026

Self-initiated funnel and retention teardown of a live mobile game

- Ran a 30-day, 56-match cohort-of-one study and mapped drop points across the full funnel: install expectation mismatch at D0, comprehension failure in the first session, fragmented progression by week two, and no social trigger driving return by week four.
- Identified the retention gap as **between-session, not in-session**: engagement while playing was strong, but no mechanism outside the app created a reason to reopen it.
- Argued that peer-to-peer acquisition, the stated path from 100K to 1M DAU, is gated on a functioning social retention loop, since users will not invite friends into alliances where 30 of 30 members are inactive.
- Designed a testable intervention (time-bound alliance-vs-alliance fixture with a mid-cycle contribution notification) and specified measurement: **D7 return rate** as primary, sessions per week and share of alliances above 50% activity as secondary, **average session length as a guardrail**, randomized at alliance level to prevent leakage across a social mechanic, with a ~5pt lift as the bar before rolling wider.
- Documented the internal metrics that would falsify the hypothesis, including baseline alliance-member retention and alliance join rate.

ACHIEVEMENTS & LEADERSHIP

- Rank 16 of 800+ colleges, National Entrepreneurship Challenge (IIT Bombay)**: placed in the top 2% of participating institutions in a year-long competition judged on venture traction, execution, and quantitative reporting of outcomes.
- Runner-up of 900+ teams, Proxy National Hackathon**: delivered a working solution and defended the underlying approach and assumptions to a technical judging panel under a fixed deadline.
- Sponsorship Lead, VITOPIA 2024**: pitched 450+ companies in 12 days and closed sponsorships for the university's annual festival, managing the outreach pipeline end-to-end.

SKILLS

Growth: Funnel Analysis, Retention & Cohort Analysis, Experiment Design, Hypothesis Formation, Market & Competitive Benchmarking

Quantitative: Financial Modeling, Unit Economics, Data Analysis, Data Reconciliation

Tools: MS Excel (advanced), SQL, Python, Notion, Jira, Figma

Relevant Coursework: Applied Statistics, Cost Accounting, Management Accounting, Engineering Clinics
