EDUCATION

Vellore Institute of Technology, Andhra Pradesh
B.Tech, Computer Science Engineering; CGPA: 8.09/10

Sept. 2023 – July 2027
Vijayawada, India

Sri Chaitanya Junior College, Bhaskar Bhavan
Class XII (PCM): 90.5%

2022
Hyderabad, India

PRODUCT WORK

Hitwicket Product Investigation

2026

Self-initiated 30-day teardown of a live mobile game

- Ran a 30-day, 56-match first-person study and traced a single failure chain: first-session comprehension, shallow decision surface, fragmented progression, inert social layer, and weak return motivation.
- Diagnosed the core issue as **features without a loop**: chat, requests, boosts and an academy all exist, but no player action produces a visible shared consequence, so the alliance never becomes a reason to return.
- Separated a comprehension problem from a depth problem within the same screen: new players cannot read the run-selection interface, and experienced players read only the probability rather than the game state behind it.
- Designed scoped interface changes rather than new systems, surfacing the incoming ball type before the choice, naming shot types alongside probabilities, and adding an alliance fixture board with per-member contribution, deliberately touching no currency, mode or monetization.
- Defined the accompanying experiment (D7 return rate, alliance-level randomization, session-length guardrail) and published an explicit list of internal data that would disprove the thesis.

EXPERIENCE

Product Analyst

Jul. 2026 – Present
Hyderabad, India

Alfaleus Technology Pvt. Ltd. (Medical Device Startup)

- Analyzed product usage and clinical feedback datasets to identify recurring failure patterns, documenting findings for the product team.
- Translated quantitative and qualitative findings into prioritized product changes affecting both clinician workflow efficiency and patient-side usability.
- Contributed to the specification of an internal coordination platform, including UI definition across 17 screens.
- Built structured reporting on device performance metrics to support internal review cycles and stakeholder updates.

Co-Founder

Sept. 2023 – May 2026
Hyderabad, India

Vectr (Content-Tech Startup)

- Defined platform positioning for a product built around minimizing user distraction, using structured market research to inform product strategy decisions.
- Tracked and analyzed acquisition funnel data across campaigns, reaching 10,000+ installs and 3,000+ Play Store pre-registrations.
- Coordinated a 30+ member team across design, engineering and operations through weekly delivery cycles.

Founder's Office

Sept. 2024 – Apr. 2025
Vijayawada, India

TROVIA

- Ran market research and owned cross-functional execution for a campus rental platform serving student users.

Venture Analyst

May 2024 – Jul. 2024
Hyderabad, India

Quick Launchr

- Evaluated 100+ early-stage companies against defined market and financial criteria; reconciled conflicting data across self-reported and third-party sources.

ACHIEVEMENTS & LEADERSHIP

- **Rank 16 of 800+ colleges, National Entrepreneurship Challenge (IIT Bombay)**: placed in the top 2% of participating institutions in a year-long competition judged on venture traction and execution.
- **Runner-up of 900+ teams, Proxy National Hackathon**: delivered a working solution and defended the underlying approach and assumptions to a technical judging panel under a fixed deadline.
- **Best Contemporary Project of 1000+ teams, ECS**: recognized for problem framing, analytical rigor, and clarity of the final presentation.

SKILLS

Product: User Research, Problem Framing, Hypothesis Design, Product Critique, Experiment Design, Specification Writing

Tools: Figma, MS Excel (advanced), Python, SQL, Notion, Jira

Core: Report Writing, Stakeholder Communication, Documentation, Cross-functional Coordination

Relevant Coursework: Applied Statistics, Cost Accounting, Management Accounting, Engineering Clinics
